What's yours?

As Maine's leading provider of health professionals, the University of New England builds on a legacy of top-ranked health professions programs (including Maine's only medical college and physician assistant program and Northern New England's only dental college) and our national leadership in inter-professional health care education.

At UNE, our vision is to provide teaching and learning that conjoins problem-based and hands-on learning, liberal education, and professional training. Our 30+ graduate and professional programs are taught by faculty who work tirelessly to provide the tools, resources, relationships, and opportunities you need to do your part—whether online, on the shore in Biddeford, Maine, or in-town in Portland, Maine.

What is the UNE advantage?

The College of Arts and Sciences empowers students to discover an array of collaborative and interdisciplinary academic experiences built upon a solid foundation in the humanities, arts, and natural and social sciences.

The College of Dental Medicine offers a blend of time-tested methods and innovations in Dental Medicine education. Our students are treated as members of the profession from the moment they arrive on campus and are given opportunities to make real impacts in patients' lives.

The Westbrook College of Health Professions prepares students to be leaders in their health care fields. Our students participate in clinical simulations, service-learning activities, and clinical rotations that enable them to transition smoothly into the workforce upon graduation.

UNE Online College of Graduate and Professional Studies partners with the University's other colleges to provide programmatic, financial, and logistical support to students enrolled in online programs while ensuring excellence and consistency in maintaining the highest academic standards.

Make a difference at UNE.

Apply by November 15th for an early action decision.
